

CS 6340 – Spring 2013 – Assignment 3

Assigned: January 23, 2013

Due: January 30, 2013

Name Sam Britt, Shriram Swaminathan,**Name** and Sivaramachandran Ganesan

At the beginning of class on the due date, submit your neatly presented solution with this page stapled to the front (40 points).

NOTE: All work on this problem set is to be done with your partner and without solutions from other past or current students. Any violations will be dealt with according to the Georgia Tech Academic Honor Code and according to the College of Computing process for resolving academic honor code violations. All work must be done using some document creation tool. In addition, graphs must be drawn with a graph-drawing tool—no hand-drawn graphs will be accepted. We'll discuss this requirement more in class.

Given the following program and the statement-based control-flow graph for that program (which you created in Problem Set 1):

```
procedure sqrt(real x):real
  real x1,x2,x3,eps,errval;

  begin
1.    x3 = 1
2.    errval = 0.0
3.    eps = .001
4.    if (x <= 0.0)
5.      output("illegal operand");
6.      return errval;
7.    else
8.      if (x < 1)
9.        x1 = x;
10.       x2 = 1;
11.      else
12.        x1 = eps;
13.        x2 = x;
14.      endif
15.      while ( (x2-x1) >= 2.0*eps )
16.        x3 = (x1+x2)/2.0
17.        if ( (x3*x3-x)*(x1*x1-x) < 0)
18.          x2 = x3;
19.        else
20.          x1 = x3;
21.        endif;
22.      endwhile;
23.      return x3;
24.    endif;
25. end.
```
