Sam Britt
CS 6340
Assignment 1

My name is Sam Britt. I am an MS student in CS, specializing in systems. I have no real relevant work experience; I co-oped as an undergraduate in a materials research firm (my Bachelor's degree is in materials science and engineering). I hope to work in embedded software for devices. I am taking this course mostly to expand my knowledge base; that is, as a "breadth course for Software Engineering." I'd like to be better (more formal, more thorough) in testing and validating my software.

This is me. My wife doesn't like this picture. Too bad.
